

CUSTOM PLANT DESIGN

When it comes to plant design, Standley Batch knows that the right layout, equipment, products, and service sets your organization up for growth and success. Not only can we start your company's new plant from scratch, we can create a custom solution to enhance your current plant's needs and design specifications. For more than 80 years, we've worked one-on-one with a wide variety of industrial operations around the globe to provide innovative plant designs and installations, such as:

- ✓ Prestressed and precast
- ✓ Bagging
- ✓ Concrete block/paver
- ✓ Frac sand
- ✓ Ready mix/dry mix
- ✓ Quarry mines
- ✓ Glass plants
- ✓ Pet products manufacturing
- ✓ Distilleries
- ✓ Construction industry
- ✓ And many more

OPTIMIZED INDUSTRIAL PLANT LAYOUT

Material handling plant layout often sets the stage for long-term operational success. Unfortunately, design inexperience, new tech and other construction priorities often lead to avoidable production line sacrifices. Our team draws on more than eight decades of material handling experience to predict congestion points and line inefficiencies, address potential capacity restrictions and plan with future production growth in mind.

INCREASED PRODUCTIVITY, IMPROVED RELIABILITY

If your operations are at capacity and you're looking to increase production, retrofitting modern equipment to your current plant is a great option. Retrofitting addresses ineffective infrastructure by upgrading conveyors and other material handling systems, as well as offering automated solutions to further improve productivity, prevent equipment failure and reduce job-site injuries.

CONSISTENT, HIGH-QUALITY OUTCOMES

For more than 80 years, Standley Batch has focused on providing our partners with smart tech, efficient solutions, effective products and excellent service to back it all up. At all stages of manufacturing – from storage and measurement to blending, delivery and replacement parts – our team can help you make the most of plant capacity and production.
